

## Pullers

Well-known design for all pulling work. Strongly made yet light and simple to operate. Unique self-locking system ensures non-slipping of jaws – the harder the pull the tighter the grip. The pulling legs with jaws on both ends have one thin and small jaw each for use in tight places.

### 2-Arm

Art.- No.	 mm	 mm	 kg
20/1	20 - 150	80	0,72
20/2	40 - 200	130	1,60

### 3-Arm

Art.- No.	 mm	 mm	 kg
21/1	20 - 150	80	0,93
21/2	40 - 200	130	2,20

## Universal Set

*in metal cases*

A combination set of universal utility. Each assembled twin grip puller can easily be converted into a triple grip puller by exchanging the appropriate triple puller head and adding extra pulling leg.

The easy interchangeability of these combination sets enable an extra wide use made available at low cost.
